

A warm greeting from your second home, Forte Village in Sardinia.

A place that remains unique in the world where you can relax in total harmony with nature, get back into shape, fill your lungs with the the “green blood” of our centuries-old park, the chlorophyll, and the iodine from our crystal clear sea and regenerate your body and spirit, forgetting the hardship of these last months. A truly incomparable place that fully restores the feeling of complete and total freedom, Forte Village will reopen on **27th June** in maximum safety for you and your loved ones, as well as all the staff of the Resort.

The only resort in the world that will apply a protocol that combines two very quick, non-invasive tests, which all of our guests will take at check-in and also all our staff. The tests will be performed by our doctors free of charge and will be extremely fast, creating the conditions for an environment in the Resort that is as safe and secure as possible for you. Our protocol, validated by a medical-scientific committee comprised of some of the top experts in the sector, will be performed by a team of specialist doctors, available in the Resort 24 hours a day, who will use cutting-edge equipment capable of guaranteeing a very high accuracy rate. This is an important investment for Forte Village which has as its primary objective to allow you and your loved ones to enjoy an absolutely **peaceful and safe holiday**, after a long and hard lockdown period.

With a little hint of pride, we would like to mention that our protocol was “borrowed” from the Bundesliga **football teams** in Germany and our own Serie A in Italy. You will finally live unforgettable days to the full again, soaking up the warm sun of Sardinia, in an habitat of unparalleled health. It will be a holiday that will allow you to rediscover big and small pleasures that we have had to do without for too long.

You can also enjoy the benefits of the **Immune System Boosting** programme, for a special strengthening of the immune system, thanks to the extraordinary treatment developed for us by the renowned Doctor Ursula Jacob.

Two additional pieces of information:

- Sardinia is the Region which had one of the absolute lowest transmission rates of the infection, even almost non-existent in the area where Forte Village is located. However, we have taken all the precautions which science considers to be the most effective, to offer you the best level of protection and comfort, and to allow you to experience moments of joy, relaxation and serenity.

- Our thalassotherapy, which has always been one of the flagships of Forte Village, is based on a protocol based on the use of brine, or magnesium chloride, that has notorious antiviral properties.

Forte Village is much more than a brand, a resort or a destination, we are "**your home away from home**". We understand more than ever the need to offer you flexible solutions in line with the current situation, and for this reason we have revised our cancellation policy to offer you the opportunity to reschedule your stay should you need to.

Kind regards,

Lorenzo Giannuzzi
CEO & General Manager
